PROFESSIONAL SUMMARY

Backend Engineer specialized in Data Extraction, Web Scraping, and SaaS Automation. I design and develop production-ready systems that transform raw web data into structured, scalable APIs. Focused on building fast, reliable backend architectures using Node.js, Playwright, Apify, and MongoDB — delivering real business value for lead generation, e-commerce intelligence, and market research.

EXPERIENCE

Apify Marketplace Developer

Mai 2026 – Present

Freelance · Remote

- Build scalable SaaS-ready Apify Actors for e-commerce data extraction (eBay, Avito.ma, price monitoring)
- Implement anti-bot strategies with Playwright: fingerprint spoofing, residential proxies, smart throttling
- Design production-ready data pipelines delivering structured JSON for market research and competitor tracking
- Publish Actors on Apify Marketplace with full input schemas, Dockerfiles, and PPE pricing strategy
- Stack: Node.js · Apify · Playwright · JavaScript · REST APIs · Docker · SaaS Architecture

Independent Backend Developer

2024 – 2026

Self-directed Projects · Remote

- Real-Time Finance Data API — crypto SaaS API with Node.js, TypeScript, MongoDB, Redis, Docker
- Jumia Web Scraping API — secure scraping API with pagination for product data extraction
- Shopify Scraper API — scalable product scraper with Redis caching, Docker, CI/CD via GitHub Actions
- Google Maps Lead Scraper v2.5 — AI-enriched leads with email extraction, scoring, OpenAI integration

KEY PROJECTS

Avito.ma Scraper Actor	PlaywrightCrawler · residential proxies · fingerprint spoofing · pagination · Apify Marketplace
eBay Scraper Actor	eBay Finding API · full input schema · proxy integration · marketplace-ready documentation
Google Maps Lead Scraper	AI enrichment · email guessing · lead scoring · Redis · OpenAI · PPE pricing
E-commerce Price Monitor	Amazon · AliExpress · Jumia · automated price tracking · PPE pricing model

TECHNICAL SKILLS

Languages & Runtimes	Node.js · JavaScript · TypeScript	Frameworks & APIs	Express.js · Nest.js · GraphQL · REST APIs
Scraping & Automation	Playwright · Apify · Anti-bot strategies	DevOps & Infrastructure	Docker · Docker Compose · GitHub Actions
Databases	MongoDB · Redis · MySQL	Auth & Security	JWT · Mongoose · RabbitMQ · SaaS Architecture

LANGUAGES

Arabic (Native) · Darija (Native) · French (Professional) · English (Technical)

OPEN TO

Remote opportunities in Backend Development · Data Engineering · SaaS Automation · Collaboration on data-driven platforms
